

IsoLoader[®]

Rapid real-time preparation
of customised securely
stranded seeds

IsoLoader[®] is a flexible, quick and convenient intraoperative solution to creating high-quality strands within the OR

- Simple-to-use, quality-engineered device enables customised strands to be built in real time within a sterile environment
- Unique technology encapsulates the seeds securely within the strand to prevent separation after implantation
- Strands can be loaded directly into pre-plugged and plug-free needles, or into transfer tubes and after-loaded
- Standard and variable load seed/spacer combinations possible, ideal for central needle loads

IsoLoader[®] is ideally suited for
4D Brachytherapy procedures

BXTA[®]

Your Brachytherapy partner, committed to delivering
innovation and service excellence for improved outcomes.
